May 12 , 1975

Dear Harold;

This coming weekend I am going to attend the symposium at USLA that I wrote to you about. I will let you know if anything interesting and new is brought out. As you know it has been in the press that the photograph of the man going into the Russian Embassy in Mexico City in 1963 and labeled by the CIA as Oswald was not of the Oswald that was arrested for the murder. This could be the assassi n that McDonaldknew from his time in the company and recognized him when the photo was reproduced in a newspaper. As I wrote to you in a previous letter, this is what I learned three years ago from McDonald.

It appears to me that there is a program now in motion, carefully worked out to look as if they are giving investigators the chance to show what the Warren Commission didn't reveal but a the same time discredit the investigators. One is Lou Gordon TV out of Detroit having a forensic pathologist from the Rockerfeller Comm. on his show. Why not Milton Helpern?

Nothing new yet on the money for the book. I am enclosing a clipping from the L.A. Times.

Regards,

Paul
